

NIKKI AISHWARYA BHASKARAN

Product Designer | UI/UX Designer

+91 89390 94131 • bnikkiaishwarya@outlook.com • nikkisportfolio.lovable.app • Chennai, India

PROFESSIONAL SUMMARY

Product & UI Designer with 7+ years designing end-to-end web and mobile products across B2B, enterprise, and SaaS environments. I translate user research into interfaces that move business metrics — including a 35% conversion lift, a 30% gain in task completion, and a 25% increase in team productivity. Fluent across interaction design, design systems, and product strategy, I partner closely with engineering and product leaders to ship accessible, scalable experiences from discovery through launch and post-launch optimization.

CORE COMPETENCIES

UX Research & Strategy: User Interviews • Surveys • Diary Studies • Usability Testing • Journey Mapping • Heuristic Evaluation • Personas • Jobs-to-Be-Done

UI & Interaction Design: Wireframing • High-Fidelity UI • Micro-interactions • Responsive & Mobile Design • Information Architecture • Accessibility (WCAG)

Prototyping: Click-through & High-Fidelity Prototypes • Interactive Mockups • Figma • Axure RP • InVision

Design Systems: Component Libraries • Design Tokens • Documentation • Governance • Contribution Workflows • Pattern Libraries

Analytics & Optimization: A/B Testing • Funnel & Cohort Analysis • Conversion Rate Optimization • KPI/OKR Alignment • Data-Driven Design

Product & Agile Delivery: Product Management • Agile/Scrum • Backlog Grooming • Sprint Planning • Roadmapping • Stakeholder Management

Tools: Figma • Sketch • Adobe Creative Suite • InVision • JIRA • ClickUp • Confluence • Framer • Bolt • Figma AI • HTML5 • CSS3 • JavaScript

Languages: English • French • Tamil • Telugu • Hindi

PROFESSIONAL EXPERIENCE

UI Designer

Oct 2024 – Present

[Programming.com](#) — Client: Samsung

- ▶ Lifted task completion rates by 30% and reduced user error rates by leading generative and evaluative research (in-depth interviews, task-based usability testing) and shipping targeted UX improvements across Samsung product lines.
- ▶ Architected and scaled a unified enterprise design system — new components, design tokens, and usage guidelines — driving consistent, accessible UI and platform parity across multiple Samsung products.
- ▶ Facilitated cross-disciplinary design workshops using divergent and convergent ideation, producing multiple validated concepts per problem and aligning roadmap priorities across design, product, and engineering.
- ▶ Partnered with Product and Engineering to define requirements, acceptance criteria, and release plans; translated UX work into quantified business impact and secured executive alignment with senior stakeholders.
- ▶ Owned end-to-end deliverables: user flows, IA, wireframes, high-fidelity UI, interactive prototypes, redlines, accessibility audits, and developer QA through production release.

Product Manager & UX Designer

Nov 2022 – Aug 2024

[Rapid Acceleration Partners](#)

- ▶ Drove a 35% lift in conversion rates across key client funnels through structured A/B testing and iterative, research-informed UX optimization.

- ▶ Established a scalable, multi-product design system — reusable components, interaction patterns, and governance documentation — improving delivery consistency and velocity while reducing rework across engagements.
- ▶ Increased team output and delivery quality by 25% by mentoring and upskilling junior designers in UX best practices, research methods, and design-system contribution workflows.
- ▶ Led ideation and concept sprints (Crazy 8s, How Might We, prioritization matrices) to converge cross-functional teams on high-impact solutions aligned to KPIs and OKRs.
- ▶ Collaborated with product and delivery leads on roadmapping, backlog refinement, and scope management to align user needs, technical feasibility, and business priorities.

Project Manager – Design & Delivery

Sep 2021 – Nov 2022

Hexaware Technologies

- ▶ Improved client satisfaction scores by 15% by owning end-to-end project plans — scope definition, dependency mapping, and resource allocation — delivered consistently on time and within budget.
- ▶ Lifted post-release client engagement metrics by 25% by structuring usability-testing cycles and translating research findings into a prioritized, actionable backlog.
- ▶ Designed status dashboards and RAID-log frameworks that gave senior stakeholders real-time visibility, enabling faster, better-informed decisions across delivery programs.

Associate Product Manager | Product Designer

Mar 2019 – Sep 2021

FABRIC — Family Business Research International Centre

- ▶ Built evidence-based roadmaps from qualitative and quantitative research (interviews, surveys, diary studies), validating assumptions and clearly prioritizing features.
- ▶ Delivered end-to-end UX artifacts — wireframes, user flows, and high-fidelity interactive prototypes — in close partnership with engineering to ensure feasibility and implementation quality.
- ▶ Championed inclusive design and WCAG accessibility standards across all touchpoints, broadening usability for diverse user segments.
- ▶ Produced product documentation, onboarding guides, and go-to-market collateral that accelerated adoption and reduced post-launch support burden.

CERTIFICATIONS & TRAINING

- ▶ **Certified ScrumMaster (CSM)** — Scrum Alliance: agile project management, sprint facilitation, and Scrum framework expertise.
- ▶ **Certified UX Designer** — CareerFoundry: end-to-end user experience design, research methodologies, and usability principles.
- ▶ **UI Design Program** — CareerFoundry: visual design systems, component design, and high-fidelity UI production.

KEY ACHIEVEMENTS

- ▶ Delivered a 35% conversion-rate improvement across multiple B2B client funnels through structured A/B testing and iterative UX optimization.
- ▶ Improved user task completion by 30% and measurably reduced error rates by leading end-to-end research and design-iteration cycles for Samsung.
- ▶ Increased team productivity by 25% by establishing mentorship frameworks and standardized design-system contribution workflows.
- ▶ Built and refined an enterprise RPA dashboard from concept to launch, using usability insights to guide prioritization and improve operator workflows.
- ▶ Facilitated 20+ design workshops (Crazy 8s, How Might We, prioritization matrices), driving alignment across product, engineering, and business stakeholders.
